

Serial No. 10/728,966

AMENDMENTS TO THE CLAIMS

1. (Original): A clitoris stimulator, comprising:

A) electrically driven vibrating means; and

B) clip means for removable attachment to the vaginal labia of a user, said clip means being mounted to said vibrating means so that said vibrating means is kept in contact with the user's clitoris.

2. (Currently amended): The stimulator set forth in claim 1 wherein said clip means includes ~~first~~first and second spring biased arm members cooperatively mounted to said vibrating means to provide sufficient gripping action against predetermined areas of said vibrating means.

3. (Currently amended): The stimulator set forth in claim 2 wherein said clip means includes a rigid curved plate with a central portion, first and second ends, said central portion being rigidly mounted to said vibrating means and said first and second ends being kept at a spaced apart relationship with respect to said vibrating means so that said first and second arm members cooperate with said first and second ends to provide sufficient grip action ~~to~~to a user's vaginal labia to keep said stimulator in place.

4. (Currently amended): A clitoris stimulator, comprising:

Serial No. 10/728,966

1
2 A) electrically driven vibrating means;

3
4 B) tubular holder means for ~~removable~~ removably receiving said
5 vibrator means; and

6
7 C) clip means for removably attachment to the vaginal labia of a
8 user, said clip means being mounted to said holder means.

9
10 5. (Original): The stimulator set forth in claim 4 wherein said clip
11 means includes first and second spring biased arm members
12 cooperatively mounted to said vibrating means to provide sufficient
13 gripping action against predetermined areas of said vibrating means.

14
15 6. (Original): The stimulator set forth in claim 5 wherein said clip
16 means includes a rigid curved plate with a central portion, first and
17 second ends, said central portion being rigidly mounted to said
18 vibrating means and said first and second ends being kept at a
19 spaced apart relationship with respect to said holder means so that
20 said first and second arm members cooperate with said first and
21 second ends to provide sufficient grip action on user's vaginal labia
22 to keep said stimulator in place.
